

CIRCULAR LOGIC

This season's motif is the circle: a halo of color and harmony. Ideas of circular forms and shapes.

in spring we catch the dance of the sun rays, the blossoming flowers, and the trees that are growing up. We take a journey under the night sky, surrounded by the vast sea, and the universe on the horizon.

Whenever we see a glimpse of light in the dark, there must be life. That's how we're encountering people's mind. Light points out their presence.

Now imagine life a long time ago: a hot air balloon at the court of Louis XVI in Paris. Imagine that period. Imagine we were living at that time. We would get our experiences and entertainment from everyday life, from the circle of the seasons, in a more natural way than today.

The circle of experiences expands into a circular feeling, and that's how the clothes take shape.

Liberty, intuitive form and impression of color can be transformed into every silhouette imaginable. Flaps and wobbles, circular ideas create this season's new line for women. Original ideas lead to a modern woman's style.
